EDUCATION

UNIVERSITY OF ENGINEERING AND TECHNOLOGY PESHAWAR (3.91 CGPA) *Peshawar, Pakistan*
BSc in Computer Systems Engineering Oct 2023 – July 2027

PROFESSIONAL EXPERIENCE

QuantumLogics — *AI/ML Intern* April 2026 – Sep 2026 | Remote

- **AI/ML Development:** Worked as a member of Team Gamma on AI/ML projects involving model training and development, later serving as Code Project Captain for the Calculus Runtime project. Currently collaborating with a team on StudyMind AI, an AI-powered learning platform for interacting with documents, websites, and YouTube content through an AI chatbot.
- **Teaching & Content Development:** Working as a Lecturer at POLYCODE, delivering programming courses and contributing to educational video content for YouTube.

Systems Limited — *Data Analytics Intern* June 2026 – August 2026 | On-site

- **Data Analytics & Development:** Gained hands-on experience with SQL, Microsoft Fabric, Power BI, Databricks, and data modeling through real-world data analytics tasks.
- **Analytics Tools:** Explored data pipelines, Lakehouse architecture, data transformation, semantic modeling, and interactive Power BI dashboards.

Ezitech Institute — *Machine Learning Intern* Jul 2025 – Sep 2025 | Remote

- **Machine Learning & AI:** Gained hands-on experience with real-world AI and ML concepts, tools, and projects.

National Center of Artificial Intelligence (NCAI), UET Peshawar — *Trainee* Jul 2025 – Sep 2025 | On-site

- **Computer Vision:** Worked on computer vision tasks including image recognition and object detection using Python and OpenCV.

PROJECTS

ResearchPilot — RAG Assistant for Research Papers with Verifiable Citations

- Built a RAG assistant where users upload research papers and get answers with page-level citations; the system checks every citation, flags unverified answers, and refuses when the papers contain no evidence.
- Improved search quality by combining keyword search (BM25) with meaning-based vector search, then adding a second model that re-reads the top results and keeps the best ones. Built with FastAPI, Qdrant, Groq and React, with paper summaries and paper comparison.
- Tested the system with 32 questions I wrote: search found the right page 96% of the time (up from 64%) and answers were correct 100% of the time on my test set (up from 88%). It correctly refused all 7 questions the papers can't answer. Added 40+ automated tests; code is open-source on GitHub.

StudyMind AI — Personal AI Learning Workspace

- Built an AI study platform where users upload documents and chat with a RAG-based chatbot that answers questions grounded in their content, with accurate source attribution.
- Implemented auto-generated quizzes, flashcards, and a weak-topic detection system that builds personalized study roadmaps from quiz performance.
- Developed the RAG pipeline (vector embeddings + ChromaDB) with multi-turn query handling and hallucination checks, and deployed the full-stack app (React, FastAPI) across Vercel, FastAPI Cloud, and Railway.

Mobile Sales Data Analysis Dashboard

- Developed an interactive Power BI dashboard to analyze mobile sales trends, quantities, transactions, customer ratings, payment methods, cities, and mobile models.

E-Commerce Sales Data — Medallion Architecture

- Built a Medallion Architecture in Microsoft Fabric using Bronze, Silver, and Gold layers for e-commerce sales data ingestion, cleaning, transformation, and analytics.

Face & Vehicle Detection System

- Implemented face recognition and vehicle detection with speed estimation and counting using Python and OpenCV.

Automated Fire Detection in Images

- Built a system to automatically detect and annotate fire regions in multiple images.

Text-Based Emotion & Cyber Abuse Detection

- Created ML models to detect cyber abuse in Roman Urdu and classify text-based emotions from unstructured data.

AI News Summarizer & Sentiment Analyzer

- Developed a transformer-based tool to summarize news articles and analyze sentiment for concise insights.

SKILLS

Technical Skills: Machine Learning, Data Analytics, Data Modeling, Computer Vision, Natural Language Processing,Lang Chain, RAG, AI Chatbots, Neural Networks, Regression & Classification Modeling, Data Processing,Information Retrieval, Hybrid Search , Reranking , Retrieval Evaluation, Vector Databases

Data & Analytics Tools: SQL, Microsoft Fabric, Power BI, Databricks, PySpark, Lakehouse Architecture, Medallion Architecture, Data Pipelines, Data Transformation, Semantic Modeling

Frameworks & Tools: TensorFlow, Keras, OpenCV, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Git, Jupyter Notebook, Hugging Face, MATLAB, Proteus, PSpice, LaTeX,FastAPI, React, Qdrant, ChromaDB, Groq API, Sentence Embeddings, Pytest, REST APIs

Programming Languages: Python, C#, C/C++

CERTIFICATIONS

- Microsoft Power BI (Self Learning) — Skill Course
- Generative AI Course — Arfa Karim Technology Incubator
- Microsoft Azure Fundamentals Bootcamp
- Google Soft Skills Program — PAFLA & Google
- Generative AI & Large Language Models (LLMs) — Udemy
- Certificate of Participation — CodeAlpha
